

YASKAWA MP2300Siec (Ethernet)

Website: http://www.yaskawa.com/site/home.nsf/home/home.html

HMI Setting:

Parameters	Recommended	Options	Notes
PLC type	YASKAWA MP23	00Siec (Ethernet)	
PLC I/F	Ethernet		
Port no.	44818		
Assembly	Input::101	Input::101~106	
instance	Output:111	Output:111~116	
Electronic key	Use	Use / None	

PLC Setting:

MP2300Siec-Motion Works IEC Express (YASKAWA) Settings:

Step 1. Before HMI communicates with MP2300Siec using Ethernet/IP, the Instance Input and Instance Output of MP2300Siec device must be set correctly. Multiple Instances are allowed to be built at one time, please click [Save] after setting.

Fig. 4 Resource Settings

Step 4. Start compilation.

Fig. 5 Editing Screen

Step 5. Download project to device- MP2300Siec, and execute Cold.

Fig. 6 Project Downloading

You may use one of the two drivers to connect Yaskawa MP2300Siec:

- 1. Yaskawa MP2300Siec driver.
- 2. Rockwell EtherNet/IP (CompactLogix) Free Tag Names driver.

(1) Yaskawa MP2300Siec driver.

Step 1. System Parameter Settings

Open EasyBuilder project, as shown in Fig. 7, Assembly Instance and Size must match the software default factory settings, and please don't select UDP. Fig.8 below shows how HMI Input / Output address is mapped to MP2300Siec device.

IP : 192.168.1.1, Port=44818 Settings
Use UDP (User Datagram Protocol)
IP Address Settings
IP address : 192 . 168 . 1 . 1 Port no. : 44818 Timeout (sec) : 5.0 V Turn around delay (ms) : 0
Assembly instance Size
Input : 101 32 (32-bit)
Output: 111 32 (32-bit)

Fig. 7 Instance Setting

Fig.8 HMI and MP2300Siec I/O Mapping

Step 2. Address Setting:

Instance 101 and Instance 111 are defined as 128Bytes, on the project window , WORD objects can be used, with data typed defined as 32-Bit Unsigned, Input addresses set to $0 \times 2 \times 4 \times 6....62$ for reading Instance 101 data.

							Femarie Input Object's Properties

Fig. 9 Address Setting

(1) Rockwell EtherNet/IP (CompactLogix) – Free Tag Names driver.

Step 1. In EasyBuilder8000/EasyBuilder Pro project, when using Rockwell EIP driver to import CSV file (as in Fig. 10), please open Structure Editor (Fig. 11), and right click on Module Defined to add New Data Type.

Fig.11 Structure Editor

Step 2. As in Fig 12, in Structure Editor add Name of the new data type. The Name must be set identically to the Data Type in Free Tag CSV file. As in Fig 14, Data Member Name

must be set identically to the Rockwell software (as Data in Fig. 13), then click [Save] (Fig. 15).
