Pie Chart & Slider

1. Overview and Operation

Overview

This demo project demonstrates the population distribution across various age groups in a city, categorized into 7 ranges. Each time the population numbers for different age groups are adjusted using the Slider, the Pie Chart will redraw to reflect the new distribution.

Operation
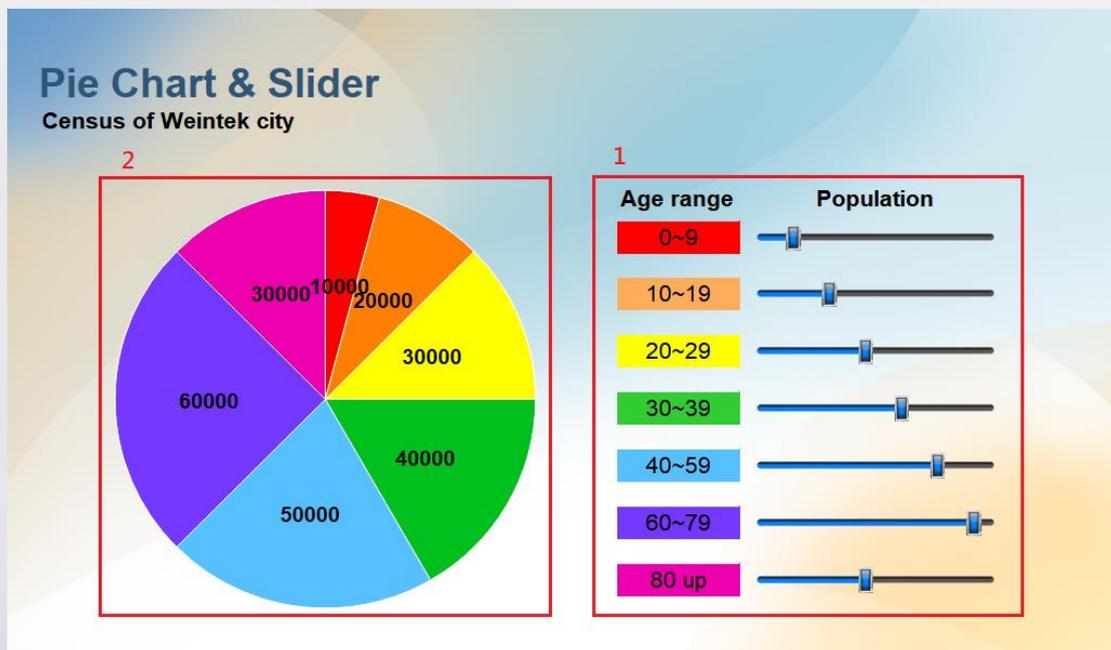

Follow these steps:

1. Adjust the population numbers for each age group using the Slider. The default values are defined in the macro.

2. Observe the dynamic changes in population distribution and the actual data for each age group on the Pie Chart.

2. Object List

Key objects used in the project are listed below, please adjust as necessary.

Object	Description
Window 10	
Pie Chart	Displays the population distribution.
Slider	Adjusts the population numbers for each age group.
