

Software Version : EasyBuilder Pro V6.08.01.214

New Supported Model

MT8072iP

Resolved Issues

1. Find / Replace address replacement issues.
2. The available number of channels setting of Trend Display is not properly limited.
3. The grid lines of Data Block Display are not correctly displayed.
4. Certain Korean fonts cannot be correctly displayed.
5. (cMT Series) The maximum number of words of Data Transfer is not properly limited.
6. cMT models cannot sample data from non-cMT models.

Communication and Drivers

1. **[BACnet/MSTP Server]**
Added support for Property 97.
2. **[Schneider M340/M580 series]**
Fixed an issue where the arrays that do not start at 0 cannot be read successfully.
3. **[CO-TRUST CTH300-H (Ethernet)]**
Expanded V address range.

Software Version : EasyBuilder Pro V6.08.01.190

New Features

EasyBuilder Pro

1. [Address Grid]

Added an option for showing only the addresses in use.

	0	1	2	3	4	5	6	7	8	9
08990	■	■	■	■	■	■	■	■	■	■
09000	■	■	■	■	■	■	■	■	■	■
09030	■	■	■	■	■	■	■	■	■	■
09040	■	■	■	■	■	■	■	■	■	■
12360	■	■	■	■	■	■	■	■	■	■

2. [Window Copy]

SQL Query related settings of a source file can be copied.

cMT/cMT X Series

Feature additions listed in this section are available for cMT / cMT X series models that support the said features.

1. [Data Transfer (Global)]

Settings can be imported or exported.

2. [Slider]

Non-local HMI device addresses can be used as watch address.

3. [Picture]

A picture object can be enabled or disabled according to the state of a bit address.

4. [Event Log]

An event can be enabled or disabled according to the state of a bit address. When an event is disabled, the communication with its related addresses is stopped as well.

5. **[File Browser]**
Non-ASCII filenames can be displayed. (OS restrictions apply.)
6. **[Data Sampling]**
The oldest data can be deleted by using the control command.
7. **[Trend Display]**
When a watch line is displayed, it will be the center line for zooming along the X axis.
8. **[Combo Button]**
Added “Change state by ranges” setting for Word Lamp. (Also available for non-cMT models.)
9. **[System Settings]**
A startup screen can be saved in a project file.
10. **[PLC Web Browser]**
Added “Rounded corners” option. (OS restrictions apply.)
11. **[Trend Display][Event Display] and similar objects whose time range can be specified**
Optimized the way to set time range.
12. **[OPC UA Server]**
Added “Information modeling mode”.

All features listed in this section are added on cMT / cMT X series for compatibility with the behavior of legacy models.

13. **[Trend Display]**
Added new option: Value alignment of Y-scale. Available modes include: “Center on tick” and “Full text”.

cMT Viewer

1. Added Droid Sans Japanese font support.

Serial Pass-Through

1. Added Mitsubishi A Series Initialization.

Communication and Drivers

1. **[CODESYS V3 (Ethernet)][Schneider SoMachine M Series (Ethernet)]**
Added support for string arrays.
